Introduction

Speech Tools is the first Egyptian and Arab company specialized in designing and manufacturing speech and language therapy tools.

Founded by:

Dr. Sayed Mostafa

Speech and Language Specialist

Certified by TalkTools

Star Institute Certified in Sensory

To provide scientifically designed tools that help children improve their speech and communication skills effectively and safely.

To become the leading company in the Arab world in manufacturing speech therapy tools with international quality standards.

Speech Tools

The Speech Tools 5 Pieces Set is a comprehensive package designed to support oral motor development and speech therapy sessions. It includes a variety of tools that target lip closure, tongue control, jaw stability, and overall oral coordination.

Key Benefits

- Suitable for clinical and home use
- Supports oral motor skills
- Enhances lip, tongue, and jaw

processing

CHEWY STICKS

The Chewy Sticks are designed with four different levels of resistance, allowing progressive chewing exercises based on the child's needs and ability. These varying levels help strengthen jaw muscles, improve oral motor control, and support safe and functional chewing skills.

The graded resistance makes the tool suitable for both beginners and advanced users, enabling therapists to customize the level of difficulty during sessions.

Content Types:

This tool is designed to create a gentle vacuum using air pressure

Tone & Style:

It helps in retracting the tongue.
It improves tongue control during therapy sessions.

Key Feature

Uses air pressure to create a gentle suction effect that assists tongue retraction

LIP TRAINER

STEP 1

Start with the lowest level to introduce basic lip activation

STEP 2

Progress to a medium level to improve lip strength and control

STEP 3

Use the highest level to enhance stability, endurance, and lip closure

Whistle

3- LEVELS:

LEVEL ONE

Enhances breath control and airflow regulation

LEVEL TWO

Improves lip closure and stability

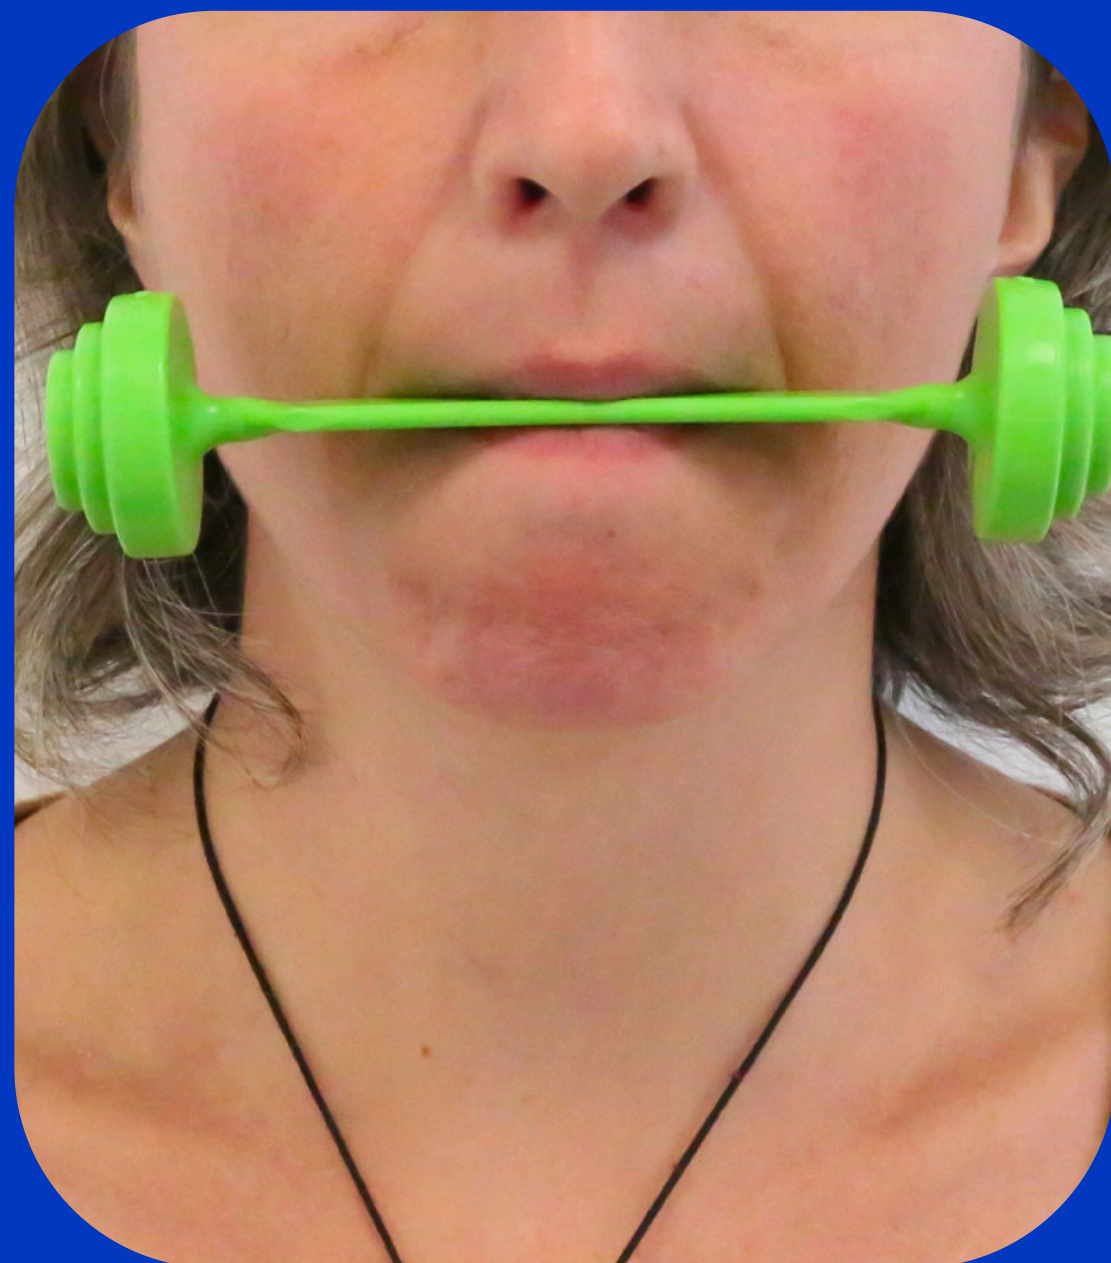

LEVEL THREE

Engaging and motivating tool for children during sessions

LIP TRAINER

This lip rehabilitation tool is designed with three progressive resistance levels, similar to weight training for muscles. Each level increases the resistance to gradually strengthen the lip muscles.

Key Metrics

- Three progressive
- resistance levels, similar
- to strength training for
- muscles

PRO BUTTON

- Definition: A professional Speech Therapy Tool designed to improve Lip Closure and Lip Strength.
- Speech Benefits: It is essential for developing the oral motor control needed to produce specific speech sounds (like /p, b, m/) and for reducing drooling by training the lips to stay closed.
